Section II: Project Description & Details

A) **Project Location:**

Municipality or Municipalities of current operations: Town of Troupsburg (future operations)

Provide the property address of the Proposed Project: County Route 84, Troupsburg, New York, 14885

Tax ID: 396.00-01-028.100

Will the Project result in the abandonment of one or more plants or facilities of the Project occupant located within the state? Yes or No

If Yes, explain how, notwithstanding the aforementioned closing or activity reduction, the Agency’s Financial Assistance is required to prevent the Project from relocating out of the State, or is reasonably necessary to preserve the Project occupant’s competitive position in its respective industry: N/A

What are the current real estate taxes on the proposed Project Site? \$1,077

If amount of current taxes is not available, provide assessed value for each:

Land: \$ 159,900 Note: Obtained from Image Mate online records.

Buildings(s): \$ NA Note: There are no existing buildings located on the property.

Are Real Property Taxes current? Yes or No

Town/City/Village: Town of Troupsburg School District: Jasper-Troupsburg Central

Does the Applicant or any related entity currently hold fee title to the Project site? Yes or No

If No, indicate name of present owner of the Project Site: Gordon J. Ross and Jennifer L. Ross – NY Troupsburg I, LLC has an executed lease with the landowners for the Project Site.

Does Applicant or related entity have an option/contract to purchase the Project site? Yes or No

Describe the present use of the proposed Project site: The proposed Project site is part of a larger portion of property. The project site is an undeveloped/agricultural field. The property may be subdivided.

B) Please provide narrative of project and the purpose of the project (new build, renovations, and/or equipment purchases). Identify specific uses occurring within the project. Describe any and all tenants and any/all end users: (This information is critical in determining project eligibility): The Project site will be leased to only NY Troupsburg I, LLC; there will be no subleases of the Project site to any third parties (except for any required lease/sublease with the Agency). The Project is approximately 5 MWac and will be interconnected to the existing NYSEG grid. This Project is a new build and will be comprised of a) racking to mount solar modules (such racking is generally pile driven into the ground), b) solar modules, c) inverters and transformers to sit on a concrete pad and d) assorted electrical components and wiring. The electricity generated from the solar farm will be sold to NYSEG customers that are part of the Applicant’s Community Solar Program.

Describe the reasons why the Agency's Financial Assistance is necessary, and the effect the Project will have on the Applicant's business or operations. Focus on competitiveness issues, project shortfalls, etc... Your eligibility determination will be based in part on your answer (attach additional pages if necessary):

The project is not viable if fully taxed, and therefore the Project will not move forward without the Agency's financial assistance to bring cost (taxes) certainty to the Project. Tax certainty will allow the Project to move forward while providing fair compensation in the form of clean, discounted energy to the Town of Troupsburg and the other municipalities within Steuben County.

In addition, the Project is within the NYSEG utility zone, which historically has lower electricity rates than other utilities (Central Hudson, Orange, Rockland, National Grid, etc). Consequently, in order for the Applicant to offer electricity at a discount to customers enrolled in Applicant's Community Solar Program, the revenue generated by the Project is expected to be lower than comparable projects in other areas. This results in returns below generally expected market returns on a solar project which would cause both financing parties and investors to seek investment elsewhere. The financial assistance provided by the Agency in terms of tax relief will provide financing parties and investors certainty in tax payments that will alleviate some of their risk on a Project with returns that are below market average.

Please confirm by checking the box, below, if there is likelihood that the Project would not be undertaken but for the Financial Assistance provided by the Agency? Yes or No

If the Project could be undertaken without Financial Assistance provided by the Agency, then provide a statement in the space provided below indicating why the Project should be undertaken by the Agency: N/A

If the Applicant is unable to obtain Financial Assistance for the Project, what will be the impact on the Applicant and County/City/Town/Village? Steuben County and the Town of Troupsburg will lose an opportunity to have affordable clean energy that is accessible. Residents that would have enrolled in the Applicant's Community Solar Program will lose the opportunity to receive a discount on their energy bills. The taxing jurisdiction will lose the opportunity to earn an amount greater than the current real property taxes being generated on the existing land. The landowner will lose the opportunity to earn rental income on private land.

C) Will Project include leasing any equipment Yes or No

If Yes, please describe: _____

D) Site Characteristics:

Describe the present zoning/land use: No zoning code. Project Site is an undeveloped field.

Will the Project meet zoning/land use requirements at the proposed location? Yes or No

If not, please describe required zoning/land use: _____

If a change in zoning/land use is required, please provide details/status of any request for change of zoning/land use requirements: N/A

Is the proposed project located on a site where the known or potential presence of contaminants is complicating the development/use of the property? If yes, please explain: No

E) Provide any additional site information or details that may be applicable to the proposed project:
As indicated herein, the subject property may be subdivided such that the solar facility is on a separate lot than the remaining lands. The total parcel size is 121 acres. The approximate lease area will be approximately 21 acres.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project: DRS- CR 84 Troupsburg Solar Farm
 Date: 10/14/2020

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Troupsburg Town Board _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

PART III – EVALUATION OF THE SIGNIFICANCE OF IMPACTS

The Town of Troupsburg Town Board has compared the impacts reasonably expected to result from the proposed Delaware River Solar (DRS) d/b/a NY Troupsburg I, LLC, NY Troupsburg I Community Solar Farm Project as outlines herein, including:

- Considered the action as defined in subdivisions 617.2(b) and 617.3(g);
- Reviewed the FEAF, the criteria identified in 617.7(c)(1) and other supporting information to identify relevant areas of environmental concern;
- For the purpose of determining significant adverse impacts on the environment of those factors listed above, the long-term, short-term, direct, indirect and cumulative impacts, including simultaneous or subsequent actions, to the extent reasonable, as included in any long range plan for the action, any action that is a result of the reviewed action or is dependent on the action was reviewed 617.7(c)(2); and
- The significance of any likely consequences was assessed in connection with the setting of the action, the likelihood of occurrence, duration, irreversibility, geographic scope, magnitude and the number of people affected as a consequence of the action. 617.7(c)(3).

The following summarizes the review of the criteria provided in 617.7(c) as indicators of significant adverse impacts and how the project has been designed to avoid significant adverse environmental impacts:

Part II, Section 8. Impact on Agricultural Resources

As the Project is proposed to take place on agricultural land, the proposed action may sever, cross or otherwise limit access to agricultural land. The proposed project has been designed to be located on land that is not mapped by the U.S. Department of Agriculture as "prime farmland soils" to the maximum extent practicable. The proposed project area will be seeded with native species to encourage pollinator species in the project area. The landowner will continue to farm the remaining portions of the property. Because the project site is within an Agricultural District mapped by the New York State Department of Agriculture and Markets (NYSDAM), the project sponsor has been required to submit a Notice of Intent (NOI) to place a solar project within an agricultural district. As such, the project sponsor will be required to adhere to the agricultural monitoring and mitigation requirements spelled out in the NOI approval by NYSDAM. A Decommissioning Plan has been prepared by NY Troupsburg I, LLC to address the removal of the Project at the end of its useful life, after which the agricultural land will be restored to pre-construction condition.

Part II, Section 15. Impact on Noise, Odor, and Light

Air quality, ground or surface water quality, traffic or noise levels, solid waste production, erosion potential, flooding, leaching, or drainage problems:

During construction, dust and exhaust from equipment may affect air quality. However, these impacts will be temporary and generally minor in nature. The solar panels will not affect air quality during operations. The solar panels are elevated off the ground on poles and will not create any new impervious surfaces that would exacerbate erosion or drainage problems. The proposed project will possess a Stormwater

October 2, 2020

Pollution Prevention Plan, will be covered under the NYSDEC Stormwater General Permit, and will require erosion and sediment control inspections during and immediately following construction. The concrete inverter pads will have a very small footprint, accounting for 0.02 acres of the 20.31-acre site, and any minor stormwater created by this pad will be retained on-site as detailed on the submitted site plans. The installation of the solar panels will not increase traffic after construction, as only 3-5 trips to the project site by the project sponsor per year are proposed. Any minor noise created by the project during operation conforms to Town of Troupsburg code and applicable state and federal regulations. Thus, there is no significant impact is anticipated for these criteria.

The Town Board of the Town of Troupsburg has reviewed the Full Environmental Assessment Form (FEAF) and the criteria contained in 6 NYCRR §617.7, completed Parts II and III of the FEAF, and has determined that the Troupsburg I Community Solar Farm Project will not have significant adverse impacts on the environment.
