

## Project Summary Sheet

Momentum of Western New York, LLC (“Momentum”)

July 2022

### Project Description

Momentum is a new, material recovery and recycling company formed in 2022, located in Bath, that will offer services to industrial and commercial businesses and municipalities. Services provided will fill a growing need, both locally and nationally, to separate from the waste stream those parts that are recyclable, with the goal being to decrease the amount of waste going to a landfill. Permitted waste will include non-hazardous liquids, sludges, soils, and solids as well as non-hazardous absorbents; no hazardous materials will be accepted at the facility. The company will specialize in windmill blade recycling and will be adding solar panels to its list of recyclable goods. (The recycling of windmill blades has been occurring through a sister company, T&R Environmental, in Bath. The scraps are sent to the Steuben County landfill to serve as daily cover. This line of business will be transferred to Momentum.)

The company is currently undergoing a rigorous approval process through the NYSDEC for a Part 360 permit which will allow Momentum to accept and recycle the waste. As such, the facility and associated structures will be designed in accordance with the strictest environmental regulations and material handling to conform to the associated NYSDEC permits.

Momentum is a spin-off of another successful business in the Bath community – T&R Environmental. Both companies will continue to be owned and operated by Brian Polmanteer and his management staff.

## **Section I, Part H. Applicant Business Description:**

Momentum of Western New York, LLC. (Momentum) proposes to design, construct, and operate the regions newest, state of the art material recovery and recycling facility within the Town of Bath's expanding industrial center with a valid NYSDEC Part 360 Permit. The facility will fill a growing need within the community and nation relating to the ultimate disposal of products, reduction in total landfill airspace available for use, and environmental sustainability related to post-consumer materials handling. The facility and associated structures will be designed in accordance with the strictest environmental regulations and material handling to conform to the associated NYSDEC permits. The permitted waste streams will include: non-hazardous liquids, sludges, soils and solids as well as non-hazardous absorbents. Construction and Demolition(C&D) debris management and materials salvage solutions for solar panel will also be undertaken at the facility. This facility will not process and will not be permitted to accept hazardous wastes on-site. The accepted waste streams all currently face dwindling opportunities for proper disposal at local facilities as they currently sit (i.e. without management/processing/reduction operations). Momentum's processes will allow these waste materials to be separated, processed, solidified in the most efficient manner possible for the most cost-effective and environmentally conscious disposal. Targeted clients will include a multitude of industrial/commercial facilities, state and local municipalities, local companies (such as car wash facilities, gas stations, etc.) to provide client-centered solutions for waste management.

## **Section II, Part B.**

### **Narrative and Purpose of the Project:**

Momentum of Western New York, LLC. (Momentum) proposes to design, construct, and operate the regions newest, state of the art material recovery and recycling facility within the Town of Bath's expanding industrial center. The project will be completed in a phased approach focusing first on major building work, site work, critical infrastructure then work will transition in the second year to specialized environmental operations within the facility. Expansion is planned to continue to an adjacent parcel following purchase to grow operations. The facility will fill a growing need within the community and nation relating to the ultimate disposal of products, reduction in total landfill airspace available for use, and environmental sustainability related to post-consumer materials handling. The facility and associated structures will be designed in accordance with the strictest environmental regulations and will have a valid NYSDEC Part 360 Permit to perform the materials handling and recycling as proposed.

### **Statement of Need:**

Space for disposal of industrial and post-consumer waste streams is dwindling at landfills. Landfills face a difficult road ahead when permitting additional airspace. Renewable energy infrastructure is coming to the end of its useful life and will be replaced with new units in upcoming years. However, many materials transported to the landfill for direct burial still have useful characteristics. Momentum seeks to connect these facts to reduce the volume of waste going to landfills by maximizing options for beneficial reuse of industrial waste. In order for this work to happen however, NYSDEC permits and approvals are required which take significant time and upfront resources. The costs to properly permit the facility are far above and beyond what it would take to start-up/operate the facility not requiring the NYSDECs involvement.

## Additional Comments from IDA

Momentum is a new, material recovery and recycling company formed in 2022, located in Bath, that will offer services to industrial and commercial businesses and municipalities. Services provided will fill a growing need, both locally and nationally, to separate from the waste stream those parts that are recyclable, with the goal being to decrease the amount of waste going to a landfill. Permitted waste will include non-hazardous liquids, sludges, soils, and solids as well as non-hazardous absorbents; no hazardous materials will be accepted at the facility. The company will specialize in windmill blade recycling and will be adding solar panels to its list of recyclable goods.
